This week, the PtX Community gathered for a virtual End of Year exchange!

With Community members joining from all over the world, we talked about what we expect and hope to see in 2025 for the [#greenhydrogen](#) and [#PtX](#) market development. Demand aggregation for [#greenfertiliser](#) in India, a one-stop-shop for green hydrogen research and funding schemes in Kenya, the implementation of the Offre Maroc, transport infrastructure in Europe... the Community looks critically but positively into the immediate future of [#PtX](#).

Thank you to our speakers for presenting their insights into Morocco, Ethiopia and Uruguay!

[Dr. Yassine ZEGZOUTI](#), PtX Trainer

[Samson Tolessa](#), GIZ Advisor

[Verónica Díaz Moreno](#) and [Noelia Medina](#)

[Alfaro](#), PtX Trainers

We look forward to continuing to build and grow the PtX Community next year!

What is the PtX Community?

International Power-to-X Hub
